My objective is to develop and apply my software development skills in creating and maintaining cutting-edge software systems and applications.

EXPERIENCE

Full-Stack Developer

LIVE WELL Exercise Clinic

Jun 2019 - Present

- Built and currently maintain automated lead acquisition system from website visitor to paid regular member
- Use, build, and maintain RESTful APIs
- Combine intuitive interfaces with smooth performance at scale to allow over 1000 users to navigate all company apps with ease
- Work closely with other teams on cross-functional initiatives to provide advanced lead acquisition and retention functionality
- Test-Driven Development (TDD) by writing integration and unit tests for software features

ruby rails 6 html (s)css javascript rspec heroku

PROJECTS

Podcast Website

thelasttrain.fm

- Built a static lightweight website that is fully responsive
- Implemented light/dark mode to enhance visual ergonomics
- Added automatic refresh feature that updates the website content weekly as episodes get released to Anchor.fm
- Setup full CI/CD pipelines so that each commit made will go through the standard process of software development lifecycle before making it to production.
