My objective is to develop and apply my software development skills in creating and maintaining cutting-edge software systems and applications.

## EXPERIENCE

Software Engineer II

Asurion | Digital Mapping Team

Jun 2021 - Present

- Constructed the logic for, and built, a streamlined Amazon review request service for over 30,000 daily orders, which greatly improved the number of reviews and feedback given to Asurion
- Built web scrapers using NodeJS and Pupeteer to automate asset retrieval for various big name clients
- Built UIs for different services, using React and Typescript, to decrease time spent on data entry and retrieval by over 75%
